APP SMASH CHALLENGE

collaborate | create | integrate

What is an App Smash?

It's the process of using more than one app to create a project/product. It's very engaging and it challenges your students to take their thinking to a higher level. The apps involved in this app smash challenge include Pic Collage and Tellagami

The Challenge

Your challenge is to create an app smash example that can be used as an assignment in your classroom

Integration Ideas

• Explanation of a product that students created

• Taking a trip back in time to describe time/place.

• Character Descriptions or stories

• Foreign Language classroom-weather forecast, directions on map, etc.

• Explanation of a math concept or equation

How Do I Do That?

1. Create a product in Pic Collage that ties to your curriculum

   Map, Directions, Narrative, Famous Explorer, Math Equation

2. Export finished Pic Collage by clicking on box with arrow

   Click on "Save to Camera Roll"

3. Create Tellagami

   Tellagami could be you, historical character, celebrity, etc.

   Import Pic Collage into Gami by clicking on "Background"

   Gami should explain/discuss product you created in Pic Collage

   Use your voice or one of Gami voices available in app

4. When done with Gami, click on "Share" button, choose "save"

"Creativity takes courage." ~Henri Matisse
